

# Protect yourself

You should buy Kovaltry® only from providers you would entrust with your health!

// Never buy medicines from “private” suppliers outside of the legal supply chain. Do not accept medication which for example has been purchased for you by friends abroad or via the Internet.

// Be wary of providers who are willing to sell Kovaltry® without a doctor’s prescription to you. Online pharmacies that offer prescription-only medicines without a prescription are in most cases selling falsified medicine.

// Prepare for trips abroad and take enough medication with you. When on holiday, don’t buy medicines from markets stalls or street vendors.

// Do not accept packaging that is incomplete or not correctly configured for retail in your country. In case of doubt, consult your physician or pharmacist

It is not always possible to tell at first glance whether sellers are trustworthy. Help is available from different organisations and associations that can tell you more about the risks or if a seller of medicine is licensed and reliable.

# Get the facts

The information provided in this flyer is just an overview of the key features of genuine Kovaltry® product packaging.

A guarantee that Kovaltry® is genuine is, however, only possible after a more detailed examination. If you feel uncertain about the authenticity, you should ask your doctor or pharmacist for advice.

You can also contact the manufacturer Bayer:

# Kovaltry® Genuine Bayer Packaging

Bayer sells its drug Kovaltry® in different packaging all over the world. All packages have safety features that are relatively consistent and clearly identifiable. They are described below in this flyer.

Here you can see individual examples of different Kovaltry® packaging.

# Beware of Counterfeits!

Recombinant Factor VIII (octocog alfa)

Identifying genuine  
Bayer products

# The Kovaltry® safety features

Bayer protects its product Kovaltry® with different safety features. Some can be seen with the naked eye. It is almost impossible to successfully imitate or counterfeit all of them in a valid combination at the same time.

**A genuine packaging will have the following features:**

## 1. Unvarnished area on the packaging

The “Bayer” wordmark runs continuously across the surface of the Kovaltry® box. It becomes visible if the packaging is tilt so light falls on it at different angles.

## 2. Microprint in the triangles

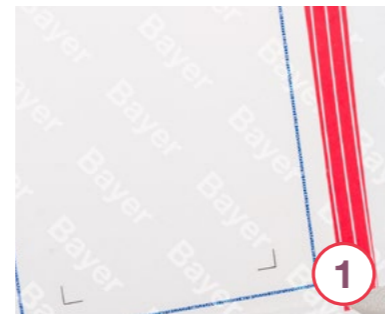

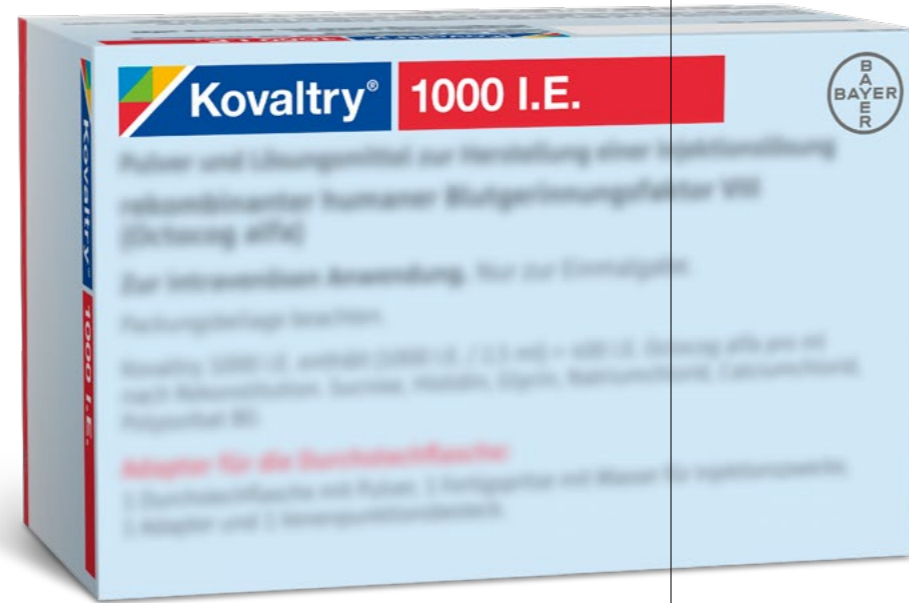

In some triangles of the Kovaltry® icon “KOVALTRY” is shown as microprint.

## 3. Security embossing

Some Kovaltry® packaging bear a special feature. The tactile security embossing changes its colour from bright to dark, depending on the viewing angle. The information contained therein (the Bayer cross on the left and the word “ok” on the right), both become visible then. Always well visible is big “K” in the middle and the coloured Kovaltry® triangles in the upper left corner.

## 4. Bayer-Stop

The vial label has a dark blue stripe at one margin. The attempt to remove the label, at the latest, stops at this stripe. Pulling the label further it tears off. On the vial a blue stripe and a metallic shining Bayer cross will remain. With removing the label, you can verify its authenticity while the label cannot be further used.

Safety features of Kovaltry®-packaging  
(further variants might be available)

## // Tamper evident closure

A genuine packaging always has a tamper evident closure.

## // Coding

In addition, many countries mandate to apply a code, often including a serial number, allowing to identify individual packages.

## // Additional important details

Basically, genuine packages are labelled with variable data (at least with batch code and expiry date).

# Beware of Counterfeits!

**Counterfeit versions of Kovaltry®**, in other words products with the same name that are purported to come from Bayer, have not yet become known even not outside the legal sources of supply.

**Bayer is committed to put much effort into retaining this situation also in the future.**

Further information about **medicinal product counterfeiting** can be found at
