Cautionary Statements Regarding Forward-Looking Information

This presentation may contain forward-looking statements based on current assumptions and forecasts made by Bayer management.

Various known and unknown risks, uncertainties and other factors could lead to material differences between the actual future results, financial situation, development or performance of the company and the estimates given here. These factors include those discussed in Bayer’s public reports which are available on the Bayer website at

http://www.bayer.com/

The company assumes no liability whatsoever to update these forward-looking statements or to conform them to future events or developments.
Bayer Pharma’s Strategic Agenda

**RENEW TOPLINE**
- Drive continued sales momentum and realize blockbuster potential of Nubeqa, Kerendia and Eylea 8mg
- Maximize the full commercial value of base business, notably Radiology and Women’s Health Care
- Prepare launch of Elinزانetant and Acoramidis

**GROW PIPELINE VALUE**
- Progress late-stage pipeline
- Replenish and advance early pipeline with increased contributions from platform companies
- New R&D model geared towards focus, quality and productivity

**LEVERAGE NEW OPERATING MODEL**
- Diligently allocate resources towards areas of high impact and value potential
- Improve organizational efficiency and productivity
- Rapidly adopt DSO across division following frontrunner success

---

Bayer Capital Markets Day 2024 // March 5, 2024 // Pharmaceuticals
Bayer Pharma Sales Diversified Across Therapeutic Areas and Geographies

SALES BY THERAPEUTIC AREAS

- Cardiovascular: 12%
- Women’s Health: 33%
- Radiology: 18%
- Oncology: 11%
- Ophthalmology: 11%
- Others: 16%

FY2023 €18.1bn

GEOGRAPHIC FOOTPRINT

- North America: ~26%
- Europe, Middle East & Africa: ~40%
- Asia Pacific: ~13%
- Latin America: ~5%
- China: ~16%

Share of Net Sales

1 Strong market positions in the respective indication  2 excl. China

// Bayer Capital Markets Day 2024 // March 5, 2024 // Pharmaceuticals
Leading Franchises Providing Sales Growth and Resilience, Margin Profile Impacted by LoE Transition and Strategy Execution

Pharmaceuticals Sales & Profitability

Key Drivers

Growing sales contributions from recently launched Nubeqa and Kerendia

Strong Eylea and Radiology performance balancing increasing headwinds from China VBP program and first LoE’s of Xarelto

Revision of R&D model and enhancement of capabilities through acquisitions of platform companies

Continued shift of resources towards R&D and launch brands; U.S. re-entry with R&D and commercial footprint

Tight cost management to fund growth investments while mitigating inflation and margin diluting change in product mix

// Bayer Capital Markets Day 2024 // March 5, 2024 // Pharmaceuticals
Launch Assets and Late-Stage Pipeline Expected to Largely Offset LoEs on Stable Base Business

**NET SALES**

- **2023**
  - Elinzanetant, Acoramidis, Asundexian Stroke: €1.1bn
  - Nubeqa, Kerendia: €4.1bn
  - Xarelto: €3.2bn
  - Eylea: €9.6bn

- **2024-2026 (cpa)**
  - Elinzanetant, Acoramidis, Asundexian Stroke: €1.1bn
  - Growth: Launch products
  - Decline: Xarelto
  - Stable: Eylea 8mg to sustain franchise sales and share

- **>2027**
  - Numerous pipeline assets to potentially fuel long-term growth
  - Rejuvenated portfolio
  - Steady base business

**Illustrative**

- Stable: Ongoing growth in Radiology and stable Women’s Health Care franchise balancing softness of other assets
Despite its Maturity, Key Parts of Our Base Business Are Benefitting from Strong Market Positions and Supportive Trends

### Bayer Pharma’s Base Business

</tr>
</tbody>
</table>

### Radiology:
Building on leading positions in contrast media and fluid delivery systems to further expand into AI and digital imaging
Market to grow mid-single digits annually

### Women’s Health (excl. Elinzanetant):
Stable Business expected, benefiting from global presence and strong market positions

### Other Late Lifecycle assets:

**China business:**
Continued VBP pressure, with Cardioaspirin and Visanne starting to be affected in 2024
Continued softness of selected mature assets expected

Ongoing growth in Radiology and stable sales contributions from Women’s Health balancing softness in remaining portfolio
With Its Unparalleled Clinical Profile, Eylea Positioned to Continue Market Leadership in a Growing Market

**Global Retinal Disease Landscape**

- **Growing ageing population**
- **Rising prevalence of diabetes**
- **Reduction in treatment burden in nAMD and DME remains unmet need – need for longer acting treatments**

**Eylea 2 mg Market Share**

- Eylea 2 mg is the standard of care in retinal diseases
- Market leader as the #1 anti-VEGF treatment

**Position to Sustain Market Leadership with Eylea 8 mg**

**Eylea 8 mg: Potential to establish the next standard in retinal diseases**

- Address unmet need with reduction in treatment burden – only drug with approved unprecedented treatment interval of up to 5 months
- Potential to improve ophthalmology clinic capacities, enabling better care for patients treated for nAMD and DME

**Recently approved in e.g. EU, Japan, UK, Canada**

³ Few markets ⁴ Typical cardiovascular brand volume genericization based on the CV brands Crestor®, Lipitor®, Valsartan®, and Plavix® (atypical curves excluded)

Historic Genericization Patterns of Small Molecules

Prior cardiovascular LoE benchmark⁵

---

¹ Based on 2023 Actual Sales ² OD patent currently being challenged in several European countries ³ In most markets end 2020, longer expiry dates in Brazil (2021), Korea (2021), Mexico (2023), Australia (2023), Malaysia (2024), and others ⁴ Such as e.g. Australia, Indonesia ⁵ Typical cardiovascular brand volume genericization based on the CV brands Crestor®, Lipitor®, Valsartan®, and Plavix® (atypical curves excluded)
Nubeqa Set for Continued Growth in Prostate Cancer
Driven by Market Penetration and Label Expansion

**Drug treated patient estimates**

- **2023**
  - nmCRPC: ~47k
  - mHSPC: ~76k

- **2024**
  - ARANOTE (ARASEC) 4
  - ARASENS

- **2027**
  - BCR (nonmetastatic)
  - ARASTEP (ARAMON) 4

- **2028**
  - (Neo-)Adjuvant (nonmetastatic)
  - DaSL-HiCap

**Phase III program**

1. **nmCRPC**
   - ARAMIS
   - ~47k

2. **mHSPC**
   - ARASENS
   - ~76k

**Net Sales Development**

- **2023**: €0.9bn
- **2024e**: >€1bn

**Further market penetration in nmCRPC and mHSPC**

- Expansion into earlier disease stages

**Stated timelines of the Phase III program refer to either launch dates of Nubeqa in this indication (ARAMIS, ARASENS) or estimated primary completion date of the respective study.**

**2030 Treated Estimates**

G7: U.S., EU5, JP

**Not label generating; supports ARASTEP/ARANOTE submission**

**Next expected Read-out**

Bayer Capital Markets Day 2024 // March 5, 2024 // Pharmaceuticals
Kerendia With Potential to Become Foundational Treatment for Broad Groups of Patients with Kidney Disease or Heart Failure

### Chronic Kidney Disease

**Phase III program**

- **T2D**
  - FIDELIO-DKD (2020)
  - FIGARO-DKD (2021)
- **T1D**
  - FINE-ONE 2025
  - FIND-CKD 2026
- **Non-diabetic**
  - ~ 700m Patients with CKD

**Net Sales Development**

- **2023**
  - €270m
  - Above-market NBRx growth and acceleration ex-US
  - +160% yoy

**2024e**

- Continuous strong market penetration US and ex-US

### Heart Failure

**Phase III program**

- **FINEARTS-HF** 2024
- **CONFIRMATION-HF (Combination with SGLT2i)** 2025
- **REDEFINE-HF** 2026
- **FINALITY-HF** 2028
- ~ 60m Patients with HF, thereof 50% with LVEF ≥40%

**Net Sales Development**

- **2023**
  - €270m

**2024e**

- ~€0.5bn

### Development Rationale

- **Phase III data from FIDELITY³:**
  - Risk reduction of first HF-related hospitalization vs. placebo
  - HR = 0.78 (95% CI 0.66-0.92), p=0.003
  - 

- **-22%**

- **High unmet need, with only limited effective/proven treatment options**

- **Potential market launch: 2026**

---

¹ Timelines of the Phase III program refer to estimated primary completion dates of the respective study ² Next expected read-out ³ Agarwal et al, EHJ 2022, 43 (6), 474-484.

// Bayer Capital Markets Day 2024 // March 5, 2024 // Pharmaceuticals
Asundexian is Targeting a High Unmet Need in Secondary Stroke Prevention

Unmet Need

~1 in 4 people have a stroke in their lifetime

Patients having a recurrent stroke within

the first year 2%
the first 5 years 10%

~27m diagnosed patients per year in top 8 markets

Mortality rate increases with each recurrent stroke 2

Recurrence rate of stroke unchanged over >20 years, despite increased SoC 2

Clinical Rationale and Status of Asundexian

Rationale

- Genetic correlation between FXIa deficiency and risk of stroke
- **Asundexian: once-daily FXIa inhibitor** with proven clinical safety in phase II program PACIFIC

Phase II Study PACIFIC-STROKE

Efficacy: >60% reduction of stroke and TIA observed in patients with pre-existing atherosclerosis 3

Safety: no significant increase of bleeding vs. placebo 3

Phase III OCEANIC-STROKE

- ongoing despite early termination of atrial fibrillation program as etiology and SoC are materially different
- current status: U.S. FDA Fast Track Designation granted, data expected in HY2 2025

---

Acoramidis\(^1\) with Competitive Clinical Profile to Treat ATTR-CM, Complementing Our CVD Franchise in Europe

**Unmet Need**

- **ATTR-CM**
  - Transthyretin amyloidosis cardiomyopathy, a progressive and fatal disease
  - Causes diastolic dysfunction and heart failure due to deposition of TTR amyloid in the heart

- **Pathogenic pathway**
  - Native TTR circulates in blood as tetramer
  - Dissociation into monomers initiates pathogenesis
  - Monomers aggregate and cause disease

~200k patients in Europe, diagnosis rates still in low teens

**Profile and Deal Rationale of Acoramidis**

- **Profile**
  - Oral TTR stabilizer for patients with ATTR-CM
  - Pivotal Phase III study ATTRibute-CM: significant reduction of hospitalization burden, improved survival and preserved functional capacity and quality of life
  - Competitive efficacy and safety vs. standard of care (tafamidis)

- **Rationale**
  - Exclusive license to commercialize Acoramidis in Europe
  - High unmet need in an underserved disease, ~17k EU patients treated with tafamidis (~€1bn of annual sales) today
  - Focused market with small, well-defined patient population and specialized centers-of-excellence playing a key role
  - High synergies with Bayer’s existing CV infrastructure
  - Filed for regulatory approval in Europe, expected launch in 2025

---

1 Acoramidis is an investigational molecule. The safety and efficacy have not been fully evaluated by regulatory authorities.

---

// Bayer Capital Markets Day 2024 // March 5, 2024 // Pharmaceuticals
Elinzanetant Offers a Differentiated Clinical Profile to Treat Symptoms Associated With Menopause

Elinzanetant Characteristics

- Non-hormonal, oral, first dual neurokinin-1,3 receptor antagonist – first double mode of action in NK class
- Studied for the effective reduction of vasomotor symptoms (VMS), and sleep disturbances
- Reduces the hyperactivity of the KNDy neuronal network involved in thermoregulation
- Generally well tolerated

Differentiated Clinical Profile

Phase III Data

Focus: Efficacy

- **OASIS 1**
  - VMS: 26 Week
- **OASIS 2**
  - VMS: 26 Week

Focus: Safety

- **OASIS 3**
  - VMS: 52 Week

Expected Readout: March 2024

All primary and key secondary endpoints met:

- **Moderate to severe hot flashes**:
  - Significant reduction of frequency and severity

- **Menopause-related sleep and quality of life**:
  - Significant improvements

- **Safety profile** consistent with previous published data
Elinzanetant Targeted to Enter Large and Underserved Market in 2025

**Market Opportunity**

**Unmet need**
Women who experience:
- Hot flashes: ~4 in 5
- Sleep disturbance: ~3 in 5
~1.3m women per year entering menopause transition in US
2/3 of women not choosing / not eligible for hormone therapy

**Well positioned for a successful launch**

1st non-hormonal, oral NK1,3-receptor antagonist + Differentiated clinical profile + #1 in Women’s Health globally with ~30% of sales in US

**Bayer Global Leader in Women’s Health**

- ~€3bn net sales
- >60m patients served
- 100,000 OB/Gyn reached

Strong foundation in Women’s Healthcare for 100 years
- Offering best in class solutions for women across all stages of their lives
- Trusted relationships with patients and customers
- Established strong commercial footprint, particularly in the U.S. as single biggest country

---

New Innovation Model to Rapidly Rebuild Pipeline
High Level of Focus, Quality and Productivity

**Focus**
Narrowed research focus from eight to four core therapeutic areas

**Quality**
Rigorous application of selection criteria have let to a more streamlined and differentiated pipeline

**Capabilities**
Biotech-like R&D operating system with a mix of innovative and diverse therapeutic modality platforms

**Productivity**
Shift to value creation, product-centric operating model, leaner governance with renewed leadership team
Focus: Zeroing in on High Unmet Need With Great Value Potential

Four Therapeutic Areas in R&D

Research focus in four areas

- Oncology
- Cardiovascular+1
- Neurology & Rare Diseases
- Immunology

1 Including Precision Cardiovascular, Nephrology & Acute Care
Quality: Pursuing Leading Innovation Across all Focus Areas

Revised Target-Product-Profile of Our Assets

Prioritization of assets based on following selection criteria:

- **Focus**
- **Quality**
- **Capabilities**
- **Productivity**

- **Value & Differentiation**
- **Feasibility & Risk**
- **Leading capabilities**

- **Streamlined portfolio**
  Pruned pipeline by more than 40% to focus on the most valuable assets

- **Shift to breakthrough innovation**
  Vast majority of assets offering the potential to be first-or best-in-class
Capabilities: Established Toolbox of Leading Modalities

Access to Leading Therapeutic Technology Platforms Through Acquisitions and Collaborations

- Innovation System
- Internal innovation
- External innovation
- Platform Companies innovation

- Therapeutic Modality Platforms
- Strong SMOL capabilities further advanced through chemoproteomics platform with strong impact on pipeline
- AAV-based gene therapy & manufacturing platform with unique pipeline
- Cell platform based on pluripotent stem cells addressing complex and rare diseases
- Radio-pharmaceuticals: Toolkit to produce best-in-class medicines augmented through collaborations

~ 120 deals signed in the last 4 years
~ 60% of NMEs from new modalities

1 Portfolio February 2024: ~40% of SMOLs (in Phase I) vs Portfolio 2021: >80% of SMOLs (in Phase I)
Productivity: Reaching Higher, Sustainable Level of Output
Achieve More and Better Solutions for Patients in a Time- and Cost-efficient Manner

- Align target-disease link with unmet need and optimal therapeutic modality
- Early de-risking of assets by strengthening relevant capabilities (e.g. human disease understanding, biomarkers, data science, digital capabilities)
- Decrease in cycle times from IND to launch through tailored development approaches, removing stifling administration and by streamlining processes
- Shift to a product-centric operating model to foster innovation, agility and collaboration

Focus | Quality | Productivity
--- | --- | ---
Generation of highly innovative INDs | Rapid progress of high-value assets | Sustainable R&D Impact
Replenishment of Early Pipeline in Full Swing; Numerous First-In-Class Pipeline Candidates to Potentially Transition into Phase II/III

Rejuvenate mid- / late-stage pipeline with several high-value assets

<table>
<thead>
<tr>
<th># Pipeline assets¹</th>

Selected examples:

- VVD Keap1 Act (advanced solid tumors): Demonstrating POC of Vividion’s chemoproteomics platform
- PSMA-TAC Cancer (advanced prostate cancer): FIC/BIC opportunity in targeted radiotherapies
- VVD Stat3 Inhibitor (solid and heme cancers): Second asset from Vividion entering the clinic

Actual / expected transitions to mid- and late-stage pipeline in 2024:

- Bemdaneprocel (Parkinson’s Disease): PSC-derived dopaminergic cell therapy; FIC potential
- Anti-Alpha2-Antiplasmin mAB (Ischemic Stroke): Effective thrombolytic with no increase in bleeding risk; FIC potential
- HER2/mEGFR Inhibitor (Lung Cancer): Targeting underserved NSCLC mutations; BIC potential

¹ Pipeline status as of Feb 20, 2024; excluding future external / inorganic projects
2 Bayer Capital Markets Day 2024 // March 5, 2024 // Pharmaceuticals
Leveraging DSO to Enhance Productivity and Speed While Managing LoE Transition

SALES
Launch products should largely balance LoE’s near- and mid-term business to return to growth thereafter

MARGIN
Drive productivity gains across whole value chain to support margins amid continued growth investments

CASH
Focus on trade working capital optimization and stringent CapEx prioritization
DSO Will Drive Speed and Productivity Enhancing Innovation and Growth

**New Operating Model**

**FROM: Traditional hierarchic, org focus...**

**TO: ... mission-centric, value-focused operating model**

- Organization revolves around *customers and products* instead of functions
- Teams to utilize *most appropriate functional expertise* when needed
- Small clusters to operate with *speed and efficient decision-making*

**Benefits**

- Customer centricity
- Product fit set up
- Faster decision-making
- Enhanced resource allocation
- Cost savings potential
- Improved long-term returns
First Successes of Frontrunner Teams Demonstrate Huge Potential Across the Value Chain

Product Supply Inventory Management
Set-up of cross-functional team to redefine collaboration with external suppliers
Potential to shorten throughput time by up to 90% - from 30 days to mere single day
Enhancing supply flexibility for our patients and improved financial performance in terms of cash and costs

US Commercial Team
Broke down franchise and functional silos to create customer and product squads
Squads are largely autonomous, cross-functional, entrepreneurial units with financial accountability
Flattened organization, e.g. 40% less managers

Early Clinical Development Oncology
Focusing on patient centered drug development across all modalities and biologies
Potential to accelerate clinical development with rapid learning cycles to explore ideas and assess progress every 90 days
Increases quality and speed of decision-making

Eylea Global Brand Team
Set-up of small, mission-focused teams, empowered to make decisions at the lowest level possible
Increased agility and ability to address critical tasks much faster than in the previous set-up, e.g. achieving fast approval of Eylea 8mg
2024 Guidance and our Mid-Term Ambition Through 2026

### Mid-Term

#### Support topline resilience during LoE’s of major products:
- Drive further launch uptake of Nubeqa and Kerendia
- Launch of Eylea 8mg, Elinzanetant and Acoramidis
- Maximize the full commercial value of base business

#### Drive productivity gains to support margins:
- Continue tight cost management to fund growth investments while mitigating inflation and margin diluting change in product mix
- Improve organizational efficiency and productivity through DSO implementation

#### Advance early assets to re-create promising mid-/late pipeline
- Sustainable generation of highly innovative INDs
- Rapid progress of high-value assets

<table>
<thead>
<tr>

<tr>
<td><strong>EBITDA margin</strong> (before special items)</td>
<td>28.7% 26% to 29%²</td>
</tr>
</tbody>
</table>

¹ Reflects our 2024 guidance at the average actual currencies for 2023; ² Estimated Sales FX impact of ~-2% pts, estimated EBITDA Margin FX impact of ~-2% pts; currency assumptions based on month-end December 2023 spot rates (1 EUR=1.11 USD, 5.36 BRL, 7.87 CNY. Impact is calculated as difference to constant currencies = at average actual currencies for 2023.
Preparing for Long-term Growth While Managing LoE Transition

Three strategic priorities:
Renew topline – grow pipeline value – leverage new operating model

Launch products should largely balance LoE’s near- and mid-term, business expected to return to topline growth thereafter.

Our advanced R&D capabilities and priorities will continue to shape a pipeline of higher quality and differentiated assets.

Rapid rebuild of healthy early-/mid-stage pipeline is in full swing, three high potential products could enter market in 2025/2026.

Productivity gains across the whole value chain will support margins amid continued growth investments.
Pharmaceuticals: R&D Developments (since last update on December 19, 2023)

- **Phase I**
  - Initiation of VVD STAT3 Inhibitor

- **Phase II**
  - Initiation of Anti-a2AP (Acute Ischemic Stroke; Pulmonary Embolism (SIRIUS))
  - Discontinuation of Regorafenib (combi Nivolumab)

- **Phase III**

- **Commercial**
  - Approval of Aflibercept 8mg DME and nAMD in EU and Japan

### Submissions

- **Aflibercept 8mg (VEGF-Inhibitor)**
  - CN: Neovasc. Age-rel. Macular Degen. (nAMD)

---

1 Bayer and partner sponsored + 3rd party label enabling studies with first patient first visit
2 Conducted by Merck & Co
3 Including Precision Cardiovascular, Nephrology & Acute Care

// Bayer Capital Markets Day 2024 // March 5, 2024 // Pharmaceuticals
### Major R&D Milestones Expected in 2024
