

# // Capital Markets Day 2021

## **Emile Nuwaysir, PhD**

### **President and Chief Executive Officer, BlueRock Therapeutics**

Emile Nuwaysir is the President and Chief Executive Officer of BlueRock Therapeutics, a wholly owned and independently operated subsidiary of Bayer. Prior to BlueRock, he was the President of a regenerative medicine division of Fujifilm (Cellular Dynamics International, Inc. – a Fujifilm Company) and President of Opsi Therapeutics. Before that, he was Chief Operating Officer of Cellular Dynamics International (CDI), where he helped manage growth from a pre-revenue startup to a public company traded on NASDAQ. Prior to CDI, he was the Chief Technical Officer and Senior Vice President at Roche NimbleGen, a division of Roche Diagnostics, where he oversaw R&D, Business Development, and Program Management. In his role, he contributed to building the company and its products, raising capital, preparing for an IPO, and successfully orchestrating a "dual-track" IPO process leading to the take-out sale by Roche. He currently serves as the vice-chairman for the Alliance for Regenerative Medicine and founder and vice-chairman of Invenra, Inc.
