

Robyn Kneen: Head of Global Regulatory Scientific Affairs for Bayer CropScience

Robyn heads Regulatory Scientific Affairs which leads efforts to develop a global science-based regulatory environment, addresses challenges to the regulatory status of CropScience technologies and drives the scientific narrative regarding the safety and benefits of Bayer's agricultural portfolio.

She has worked at Bayer for more than 30 years with experience in multiple roles across Research and Development functions as well as in Public Affairs and Communications, in the UK, France, Germany, and the USA.

Robyn is passionate about science, innovation and developing people and has led many corporate culture initiatives to develop high performing teams and an effective workplace.

Robyn earned her bachelor's degree and MSc in analytical chemistry from Ruskin University, Cambridge, England. She is currently located in St. Louis, MO, USA holding dual British and US citizenship. She is married and enjoys golfing, travelling and international cuisine.
