

## **Senior Identity and Access Management Engineer**

You will be accountable for project consulting, policy and standards creation, and providing secure IAM solutions to protect Bayer's applications, infrastructure, and intellectual property across the global IT environment.

The scope of this position covers Web Access Management, Authentication services, Authorization services, API/Cloud Identity services and Identity Datawarehouse and analytics.

This is a hands-on position, working in an Azure environment and running IAM projects with multiple stakeholders.

### Your Tasks and Responsibilities:

- Engineer, deploy and support IAM-related technologies.
- Partners with other IT and Business Teams to ensure understanding of and alignment with their business goals
- Partners with stakeholders to champion Security Policies and Standards for Bayer globally
- Collaboration with other IT and global functions
- Drive projects and authentication efforts, and ensure implementation and transition to operational support
- Provide technical consulting to peers within Engineering team and provide guidance to support team members.
- Provide documentation for the services and strategies developed in the domain

### Who You Are:

- Minimum of a Bachelor's degree, or equivalent combination of education and experience
- hands-on experience with one of the main cloud providers (Azure, AWS, GCP).
- Strong understanding and experience with at least one of: SAML, OAuth, Single Sign On (SSO), Multi-Factor Authentication (MFA), Authentication and Authorization
- Developer background - big plus.
- Previous experience developing and administering an enterprise Identity and Access Management and Governance platforms.
- Strong Background in Information Security and associated methodologies
- Ability to define the approach for and drive implementation of secure designs and recommendations through project consulting, or project ownership
- Applied experience with information security policy and standard development and enforcement
- Demonstrated ability for root cause analysis, problem solving, and resolution
