

## Important Update About COVID-19

Bayer is taking all necessary measures to keep our employees and neighbors safe during the COVID-19 pandemic crisis. We are restricting access to our sites, encouraging employees who can to work from home, and implementing social distancing guidelines for those who cannot.

Bayer also remains committed to ensuring that those whose lives, health and comfort depend on our products have access to Bayer's products during these challenging times. Led by our highly committed employees around the world, we are implementing the necessary measures to ensure business continuity in our operations. Ensuring the supply of our products for patients is our highest priority at Bayer, and we are working to keep supply continuous and reliable.

These are unprecedented and challenging times for all of us, and we will continue to do what is right for our customers and employees. Some of these efforts include but are not limited to:

- Standing with our patients dealing with financial challenges. United States residents who have lost insurance coverage and face financial hardships can call 1-888-842-2937 to determine eligibility for immediate free access to Bayer prescription medicines.
- Joining the U.S. Government's fight against COVID-19 with the donation of three million tablets of the drug Resochin (chloroquine phosphate). The U.S. Food and Drug Administration issued an Emergency Use Authorization (EUA) to allow donated chloroquine phosphate products to be distributed by Health and Human Services (HHS). For more information, [please contact HHS](#). If you have any questions, please contact Bayer Medical Communications at 888-842-2937 for more information.
- Donating one million self-care products to support the health of underserved communities in the U.S. The products, including OTC medications & multivitamins such as Aleve, Alka-Seltzer Plus, Bayer Aspirin, Claritin, Flintstones and One-A-Day Vitamins, were delivered directly to Americans who can't easily access them today through Direct Relief & Feeding America.

For questions about our pharmaceutical products and services, please contact Bayer Medical Communications at 888-842-2937. For our over-the-counter products, please call 800-331-4536. And for our crop protection products, please call 314-694-1000.

Protecting our employees and communities while serving patients, customers and consumers remains our top priority. By acting reasonably and with good judgment we will continue to meet this important goal.
