/// 4th Generation Corn Rootworm Trait (CRW4) Next-Level Defense Against a Billion Dollar Bug

THE CHALLENGE

Corn rootworm can cause up to 45% yield loss

THE SOLUTION

Stack two new insecticidal proteins with enhanced RNAi technology for corn rootworm control

THE BAYER DIFFERENCE

First new protein-based mode of action for CRW control in over two decades

Delivered in high-performing genetics to protect yield potential

Builds on industry-leading SmartStax and VT4PRO™ platforms with next-gen protection
