

Blockbuster

Vyconic™

**Maximum Performance,
Unparalleled Flexibility**

THE CHALLENGE

Lack of herbicide options
against resistant weeds

THE SOLUTION

Industry-first trait stack with
tolerance to five herbicides

THE BAYER DIFFERENCE

Superior yield potential from
industry-leading genetics

In addition to glufosinate, glyphosate
and dicamba, Vyconic™ adds tolerance
to 2,4-D and mesotrione to give
growers unmatched flexibility¹

Targeting a 2027 market introduction providing
a significant head start on industry alternatives

1. Not all formulations of glyphosate, dicamba, glufosinate, mesotrione or 2,4-D are being pursued for regulatory approval for in-crop use with Vyconic™ soybeans
