

Blockbuster

//// **Plenexos[®]**

Two-Way Systemic Insect Control with Flexible Soil and Foliar Use

THE CHALLENGE

Sucking pests hide and multiply beneath the canopy, causing significant crop damage and economic loss before detection

THE SOLUTION

Protect plants as they grow while disrupting multiple pest life cycles

THE BAYER DIFFERENCE

Versatility across soy, cotton, vegetables, melons, citrus and other specialty crops

Prolonged protection for the whole plant, including new growth

Potential to cut labor, reduce applications and save fuel

Ability to safeguard beneficial insects and pollinators while targeting sucking pests
