

Convintro™ Herbicide

**A new tool to tackle
today's toughest
weed challenges**

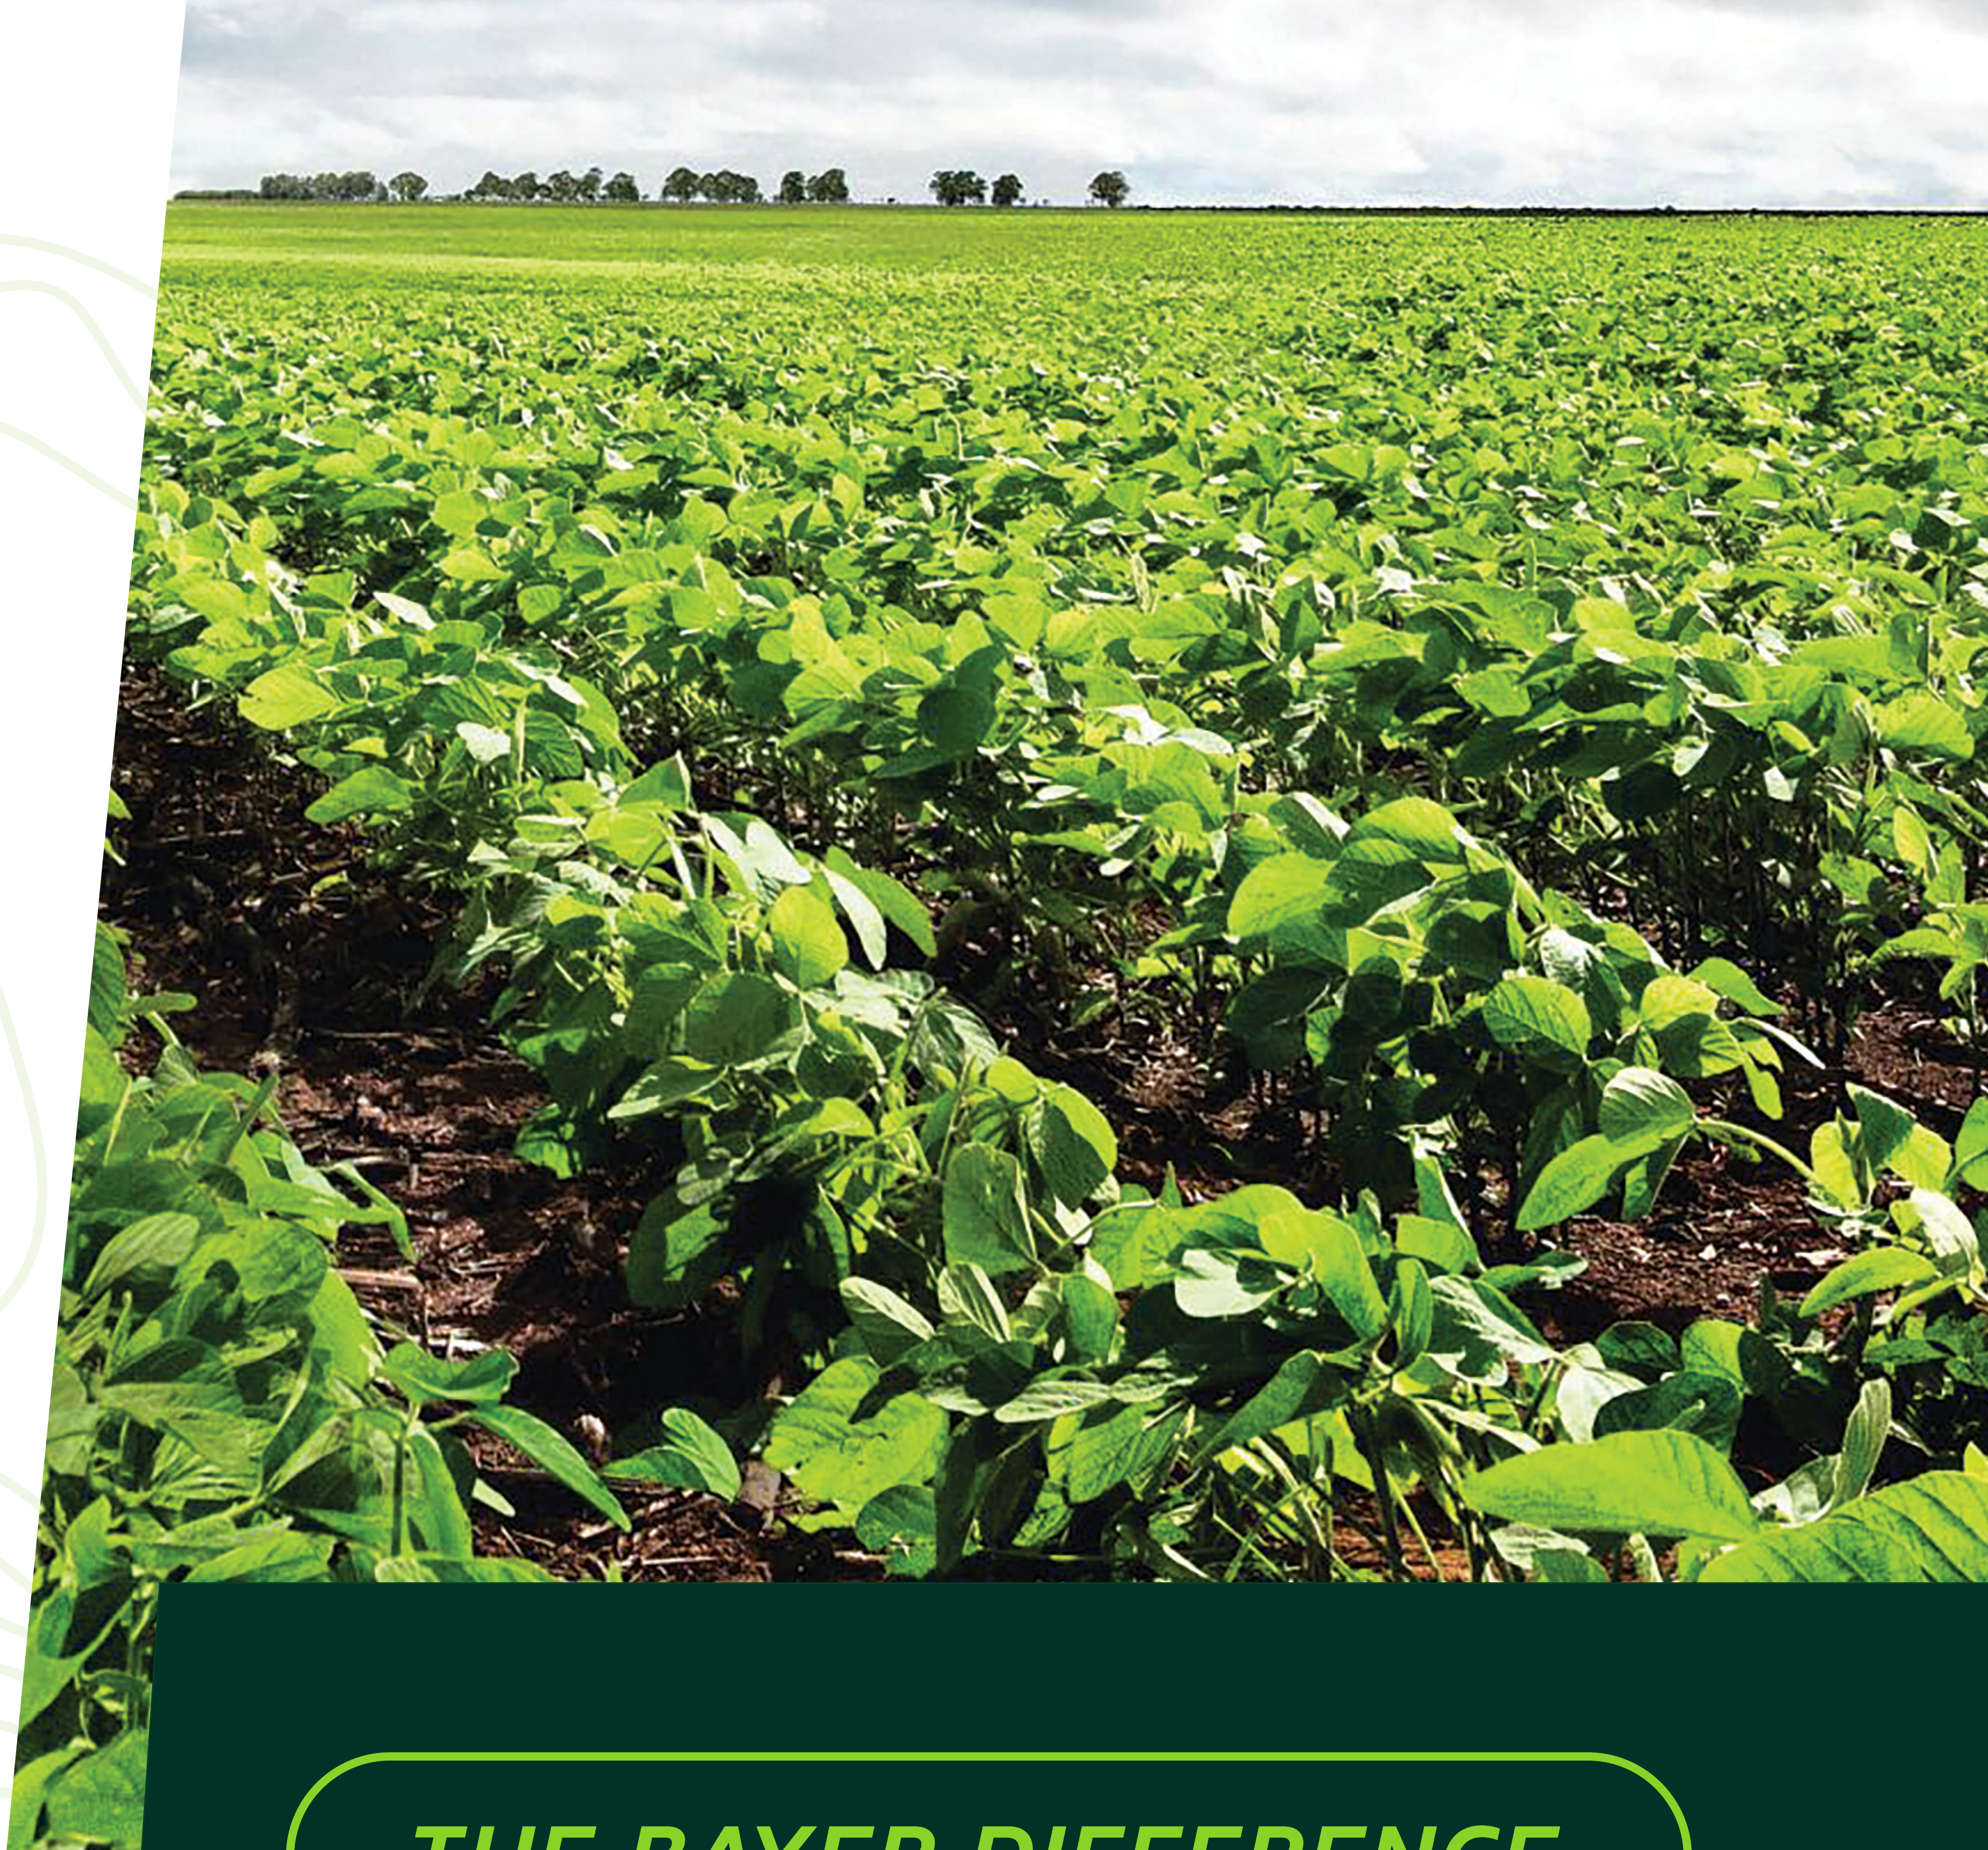

THE CHALLENGE

**The continued spread of
resistant waterhemp and
Palmer amaranth across
the United States**

THE SOLUTION

**First Group 12 herbicide
active ingredient
introduced for U.S. corn
and soybean production**

Learn More:

THE BAYER DIFFERENCE

Weed Management:

Targeted activity to help control
early-season pre-emergent
Palmer amaranth and waterhemp

Tank Mix:

Flexibility to customize programs
for specific field needs with
other herbicide groups

Extended Residual:

Protection throughout the
critical early season to help
protect yield potential
